ABSTRACT

Enrollment statistics for the 1976-1977 academic year in the New England Regional Student Program are presented. At both undergraduate and graduate levels, the regional program allows eligible students to receive preference in admission among out-of-state applicants in participating states, and to be charged only the in-state tuition upon admission. Benefits, eligibility, participating colleges, and application information are explained. Statistics are included in the following categories: the non-contract program, the health professions contract program, state participation, enrollment at two-year colleges and institutes, enrollment at New England state colleges, and enrollment at the six state universities and the University of Lowell and Southeastern Massachusetts University. States participating in the program include Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont. Among findings of the study were that there was an overall increase in enrollment of over seven percent for the academic year 1976-1977, that enrollment in the health contract programs increased 12 percent, that 593 degree study programs were offered for regional enrollment by public colleges and universities, and that enrollment is highest in health-related courses and in such fields as forestry, business administration, and library science. new england regional student program

the undergraduate level

Benefits

Students who meet the eligibility requirements for residents of their state, and the admissions requirements of the institution and program to which they are applying, will

. . . receive preference in admission among out-of-state applicants

. . . be charged only the in-state tuition upon admission to that program.

Eligibility

Qualified New England residents are eligible to obtain the benefits from any of the regional curricula open to residents of their state. Transfer privileges will continue in effect for students from an accredited institution of higher education who are residents of one of the New England states and who meet the particular admissions requirements at the institution and for the course of study in which they wish to enroll.

It is assumed that students accepted into a program of study offered under the New England Regional Student Program will remain in the same field of study. If a student transfers into a program which is not included in the Regional Student Program, out-of-state tuition will, of course, be applicable as of the date of transfer.

There are two eligibility rules:

1 "The Uniqueness Rule" – When a study program is not offered at an in-state institution, a qualified student may apply for enrollment at an out-of-state institution offering that program under the Regional Student Program.

2 "The Proximity Rule" – When a study program is offered at both an in-state and an out-of-state institution, and the out-of-state institution is closer in traveling time to the student's legal residence, that student may apply for enrollment at the out-of-state institution.

State Universities

For New England residents interested in attending a state university, only Rule 1 – "The Uniqueness Rule" – applies.

State Colleges

For residents of **Connecticut, Massachusetts, Rhode Island** and **Vermont** interested in studying a regional student program offered by a state college in one of those four states, both eligibility rules apply. For residents of **Maine** and **New Hampshire** interested in attending a state college, only Rule 1 applies.

Two-Year Institutions

For New England residents interested in attending a two-year institution, both eligibility rules apply.

the graduate level

Benefits

Students meeting the eligibility requirements for residents of their state, and the admissions requirements of the institution to which they are applying, will, as is the case on the undergraduate level, be charged only the in-state tuition upon admission to that institution. At the state colleges, students applying for admission under the Regional Student Program receive admissions preference among out-of-state applicants.

Eligibility

Eligibility rules are the same for the graduate as for the undergraduate level. Only Eligibility Rule 1 – "The Uniqueness Rule" – applies to programs offered at state universities. Both rules apply to residents of **Connecticut, Massachusetts, Rhode Island** and **Vermont** wishing to apply to a program offered at a state college in one of those four states. Only Eligibility Rule 1 is applicable to programs offered in **Maine** or **New Hampshire** or to residents of those states applying for admission elsewhere.

How to Apply

For necessary forms and detailed information, inquiries should be directed to the dean of the graduate school at participating universities or to the director of admissions at participating state colleges. Applicants must clearly indicate, both in their initial inquiries and on their application forms, that they are seeking admission under the terms of the New England Regional Student Program. Those seeking admission to a general subject area, e.g., history, must specify precisely the area of specialization they wish to follow. Applicants may be required, in the case of university programs, to obtain certification from the dean of the graduate school of their home state university to the effect that the program of study desired is not available at the home state university.

the contract program

The New England Board of Higher Education presently administers the following student space contract programs:

Occupational Therapy – undergraduate level for residents of Massachusetts

Physical Therapy – undergraduate level for residents of Massachusetts

Dental Medicine – professional level program for residents of Maine

Medicine – professional level program for residents of Maine, Massachusetts and Rhode Island

Veterinary Medicine – professional level program for residents of Connecticut, Maine, Massachusetts, Rhode Island and Vermont

NEW ENGLAND REGIONAL STUDENT PROGRAM

ENROLLMENT REPORT

HIGHLIGHTS 1976-1977

.... An overall increase of 7.3 percent, or 270 students, for a total of 3,954 students enrolled in Program

.... Enrollment in non-contract study programs totals 3,498 students in 593 separate study programs at one or another of the public colleges and universities in the region – an increase of 6.7 percent

.... Enrollment in health professions contract study programs totals 496 in the fields of dentistry, medicine, optometry, occupational and physical therapy, and veterinary medicine – an increase of 12 percent over 1975-1976

.... Enrollment shows use of 593 degree study programs offered for regional enrollment by the public colleges and universities

.... Enrollment is highest in health-related courses and in such fields as Forestry, Business Administration, and Library Science

NEW ENGLAND REGIONAL STUDENT PROGRAM

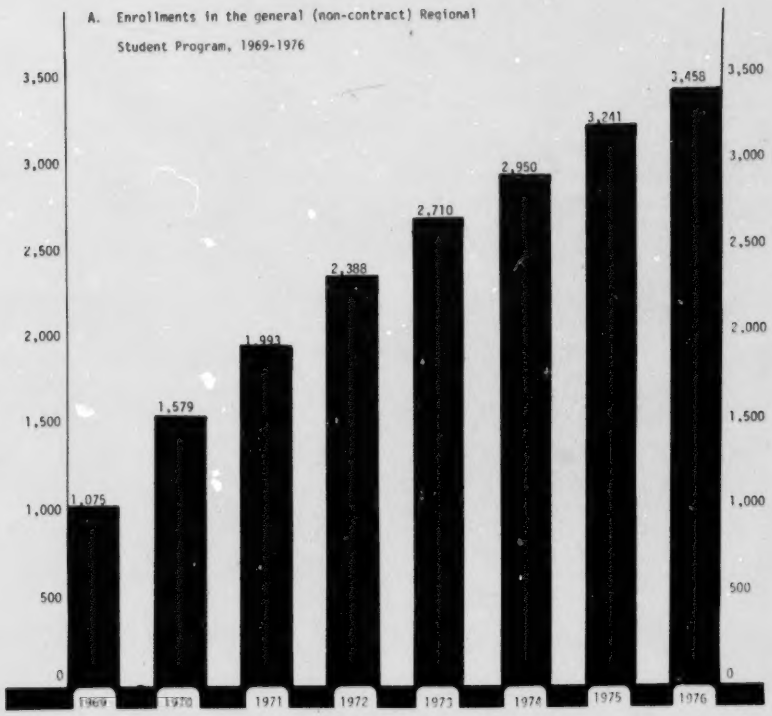
ENROLLMENT REPORT, 1976-1977

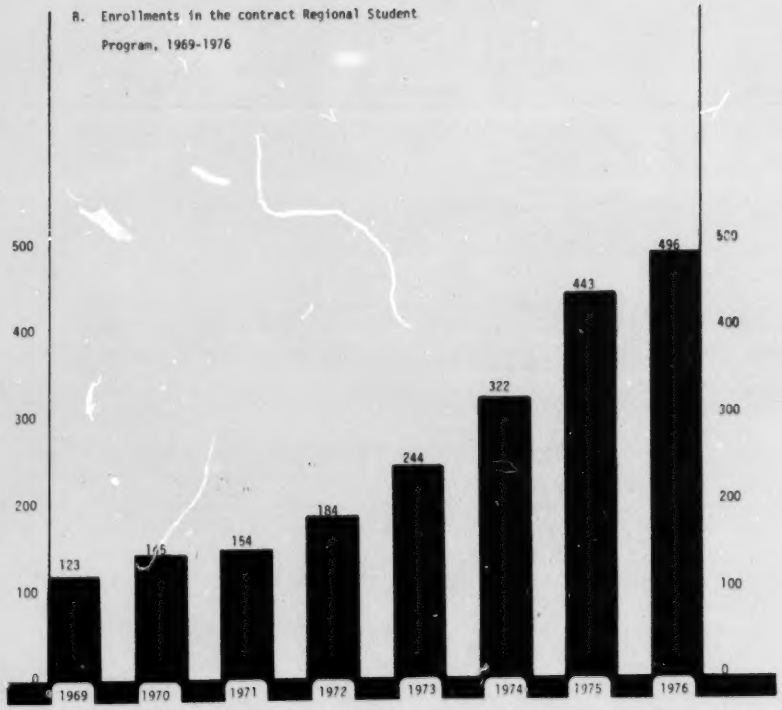
The number of New England residents who gained access to higher education through this Board's Regional Student Program increased in 1976-1977 by a total of 270 students, bringing total student participation to 3,954 — an increase of 7.3 percent. This is significant in comparison with the general enrollment situation in the region's public colleges and universities, where statistics issued by the U.S. Office of Education show a decline of 5.8 percent, or a loss of over 22,000 students, in the same time period.

As the two following tables illustrate, student enrollment in both areas of the Program continues to follow previous growth patterns. In the general (non-contract) Regional Student Program, where students are enrolled in an out-of-state public college or university for degree studies not available in in their home state, or, in the case of two-year colleges and some state colleges, for studies available at the geographically closest institution, the total enrollment expanded 6.7 percent (217 students) over the 1975-1976 figures. In the health professions contract area of the Program, where students are enrolled in degree studies for which state governments provide the institutions with a cost-of-education subsidy for each student space, the enrollment increase totalled 53 persons, a 12 percent advance over 1975-1976. It is clear that the total program is increasingly successful in serving the higher educational interests of New England residents.

NEW ENGLAND REGIONAL STUDENT PROGRAM

ENROLLMENTS, 1969-1976





Within the several levels of higher education there were wide variations in comparative enrollment patterns. In the public universities, 181 more students were enrolled as undergraduates — an increase of 15 percent; there was also a 15 percent enrollment increase (66 students) at the state colleges. Minor decreases in enrollment occurred in the two-year colleges and at the graduate level in the universities — 26 students and 4 students respectively. These declines had no appreciable effect on the general pattern.

The participating institutions offered admission this year to over 700 degree study programs which were not available in the colleges or universities of one state or another. The students in the Program were enrolled in 593 of these courses of study. In 471 of these courses, enrollments show five or fewer registered Program students. They constitute, in effect, marginal enrollment and have no real influence on the existence of the courses or on the institutional costs of operating the courses. Forty-nine (8.3 percent) of the courses show enrollments of 15 or more students. In these cases the enrollment of Regional Program students is a factor in the existence of the courses and attendant operating costs. Of these 49 study programs, 12 are at two-year colleges, nine are at state colleges, and 28 are at public universities.

Reports from the two-year colleges and institutes in the region indicate that the majority of regional students attending these institutions do so on the basis of the "proximity" rule — that is, they are enrolled in programs available in their home states which are also available at an out-of-state institution closer in travelling time to their home. Northern Essex Community College in Massachusetts, for example, records 233 regional students, all of whom commute from the bordering state of New Hampshire. Of these 233 students, 172 are enrolled in business, secretarial, or liberal arts programs.

Truly "unique" programs tend to draw the largest numbers of regional students at the state colleges and universities. Recreation programs, unique within the state college sector to Johnson and Lyndon State Colleges in Vermont, appear to be extremely popular; Johnson records 35 regional students enrolled in its Recreation Facilities Management program, while Lyndon has 106 students enrolled in its Park and Recreation Services Administration program under the auspices of the Regional Student Program.

The greatest numbers of regional students enrolled in any one field of study are reported in the two Pharmacy programs available in the region; the 121 students enrolled in that program at the University of Connecticut and the 185 enrolled in the same program at the University of Rhode Island account for 8.8 percent of the total non-contract Regional Student Program enrollment in the academic year 1976-1977. Student interest in health-related fields remains high; while increased demand from residents of their home states has forced many institutions to limit the numbers of students from out-of-state, most institutions offering health-related programs do indicate a consistently high number of applications, and report Regional Student Program enrollment in all such fields.

As has been the case for several years, Forestry is extremely popular. The University of Maine reports 70 regional students enrolled in its bachelor degree program, the University of Massachusetts 24, and the University of New Hampshire 40. Other programs with consistently high numbers of regional students enrolled include the master's degree program in Social Work at the University of Connecticut; the Law programs at Connecticut and the University of Maine; the Special Education and Criminal Justice programs at the University of Maine; Hotel, Restaurant and Travel Administration at the University of Massachusetts; Hotel Administration at the University of New Hampshire; Library Science and Journalism at the University of Rhode Island; and Radiological Technology (an associate degree program) at the University of Vermont.

NEW ENGLAND REGIONAL STUDENT PROGRAM ENROLLMENT

1976-1977

In this area of the Program a majority of the 496 participating students are enrolled at private universities. The largest single group is the Physical Therapy contingent of students enrolled at Boston University, Northeastern University, and Tufts University. They are followed closely by medical students, most of whom are enrolled at the University of Vermont and some of whom are at Boston University and Tufts University. The third largest group is enrolled for Occupational Therapy studies at Boston University and Tufts University. The next largest group of students is enrolled for studies in veterinary medicine at the New York State College of Veterinary Medicine at Cornell University, and at the University of Pennsylvania. The smallest group is in the field of optometry, where students are enrolled at the New England College of Optometry.

While enrollment through this procedure continues its steady increase in 1976-1977, the equally steady increase in costs and complexities of relevant contracts will pose difficulties in the future for the Health Professions Contract Program.

[6] Connecticut, Maine, Massachusetts, Rhode Island, and Vermont residents at University of Pennsylvania School of Veterinary Medicine and New York State College of Veterinary Medicine at Cornell.

STATE PARTICIPATION

Although there are imbalances in any single year in the in-flow and out-flow of regional students from any single state, the level of state participation in the Program correlates highly with the size of the public higher education sector of the six states.

Using 1975 total enrollment figures (undergraduate, graduate, first professional degree and non-degree credit students) the rank order among the states is 1) Massachusetts, 2) Connecticut, 3) Maine, 4) Rhode Island, 5) New Hampshire and 6) Vermont.

The same order applies when ranking the states in terms of both the numbers of regional students studying within the state and the number of programs open to students from other states under the New England Regional Student Program.

This suggests that the level of state participation in the New England Regional Student Program is a function of the size of the public higher education sector and the breadth of its curricular offerings.

The charts on the following pages summarize each state's activity in the Regional Student Program for 1976-1977.

The New England Board of Higher Education is a public agency authorized by the New England Higher Education Compact, a formal interstate agreement among the six states ratified by the United States Congress in 1955. The Board was established to develop, direct and promote activities which increase educational opportunities and efficiently utilize all of the region's higher educational facilities. The Compact specifies that a coordinated interstate program of higher education shall be established and maintained by the Board, and that the Board shall assist the states and all institutions of higher education in the region in their common efforts to provide high quality education. The Board thus serves as a catalytic agency which crosses New England state boundaries in the interests of higher education.

The Board initiates and develops areas of cooperation and mutual interest among the more than 260 universities, colleges and institutes, both public and private, in New England. The Board is further charged with a responsibility to provide factual and evaluative data of relevance to these purposes.
The following functions are primary in achieving the Board's purposes:

- To provide a facility and staff capable of continuous research and evaluation relevant to higher education in New England
- To serve as a center for the collection and dissemination of information pertinent to the institutions and agencies concerned with higher education
- To serve as an administrative and fiscal agent for higher educational contracts and agreements among the institutions and governments in New England
- To provide consultative services on educational topics of major regional significance to the institutions, agencies and governments of New England
- To serve as a vehicle for the regional implementation of federally and privately financed programs related to higher education

Each state is represented on the Board by members of academic, professional, governmental and citizen groups appointed by the governor and legislature of each state. Each state delegation annually elects a chairman who serves on the Board's Executive Committee.
